SKILLS

Java SE/EE

Spring Boot

Hibernate/JPA

REST APIs

Microservices

AWS

GWT

Vaadin

HTML/CSS/JS

Docker

Jenkins

Maven

MySQL

Oracle

DB2

TDD

DDD

SOLID

Elasticsearch

PostgreSQL

CI/CD

Linux

Scrum

AI/ML

Startup Strategy

LANGUAGES

Dutch — Native
English — Professional
French — Basic

EDUCATION

OCA Java SE 8 Programmer I (2017)
VDAB HBO Java EE (2016)
Electronics & ICT — Dirksen University (2010)

PROFESSIONAL PROFILE

Started in 2007 as an embedded hardware/software developer in the automated guided vehicles industry. After a few years developing all kinds of automated systems I realized my passion was solely software development. So I followed a brief software course to up my Java/Web skills to transform business cases to working code/architectures.

Passionate about turning data into actionable insights. Exploring the intersection of data-driven behaviour, customer feedback, and digital strategy. Believer in evidence-based decision-making for marketing and product innovation.

Currently working on projects that map customer journeys, analyze behavioural data, and drive measurable impact.

EXPERIENCE

TriggerIQ — Founder

- Jun 2025 - Present · Valencian Community, Spain
- Lead product vision, growth strategy, and customer success for AI decision intelligence platform
 - Built cross-functional teams across AI/ML, data engineering, and customer success
 - Spearheaded development of core decision intelligence engine
 - Secured strategic partnerships and early adopters in target industries
 - Launched MVP in May 2025, gaining early users within 8 weeks
 - Reduced decision cycle time for clients using real-time insights

ReLeaseNow.be — Founder

- Jun 2025 - Present · Antwerp, Belgium
- Created Belgium's first digital platform for car lease transfers
 - Designed platform for lease matchmaking, contract transfer, and onboarding
 - Integrated secure digital signature and ID verification (with Enkryptify)
 - Negotiated with leasing companies, dealers, and legal advisors
 - Developed GDPR-compliant data flows and verification processes
 - Created brand identity and multi-channel marketing campaigns

Damno Solutions — Java Software Developer

- Oct 2021 - Present · Schoten, Belgium
- Developing data-driven solutions to analyze user behavior and customer interactions
 - Coupling open source projects through custom interfaces and APIs
 - Implementing solutions that transform raw data into actionable business insights
 - Current focus: Building interfaces between marketing analytics tools and customer feedback platforms

HeadBird — Back-End/Front-End Java Developer

- Oct 2019 - Jun 2025 · Wilrijk, Belgium
- Developed applications for processing freight bookings and customs declarations using Spring, GWT, and Vaadin
 - Created fuel consumption reporting system with analytical capabilities
 - Implemented Elasticsearch POC for centralized logging and monitoring
 - Set up Docker containers and CI/CD pipelines using GitLab runners

Earlier Professional Roles

- Cheops** (2019): Spring Boot application for environmental permits
- GET Time & Security** (2018-2019): Time registration system with CORBA integration
- From In** (2018): School license management with REST API
- Embedded/IoT roles** (2007-2018): AGV systems, healthcare IoT, automotive testing
